

Greetings from EuphoriaPack!

Please find below a brief introduction of our company. Please let us know your detailed requirement.

Euphoria Packaging LLP is the largest manufacturer in the country of Tamper evident and Tamper Proof bags in both Plastic (Virgin grade or upto 80 % Recycled material) and Paper (Recycled). We are manufacturing more than 600 million bags per annum and currently supporting various segments like E-Commerce packaging, Garments packaging, FMCG, Pharmaceutical packaging, Bank Confidential documents packaging, Education, Industrial packaging, Agriculture etc...

We are specialized in manufacturing Poly Mailers, Tamper Evident Envelope, Tamper Proof Courier Bags, Clear Self Seal bags/Garment Packaging bags, Cheque Book Envelopes, High Security Envelopes, Bubble Lined Envelopes, Packing List Envelopes, Shopping & Retail Bags, Gold Loan Pouches, Document Pouch, Diaper/Sanitary Napkin packaging bags, Bread Packaging bags, All kinds of LDPE/LLDPE/HDPE Films, Shrink film, Agriculture/Mulch Films, Bopp Tapes, All kinds of LDPE Bags and Paper bags and more.

Manufacturing Unit based in Ahmedabad (India) and Marketing Office in Mumbai, Surat, Delhi, Bengaluru & Chennai (India).

Euphoria Packaging products are categorised into various market segments:

- E-Commerce Courier bags and transport bags in Plastic & Paper for online retailers and express shipping
- Protective packaging (Poly bubble/Kraft Bubble) for shipping fragile items
- Security bags for Gold, Cash, Checks and Coins deposits. Also used for transporting the same to different locations.

Many technical aspects are developed and engineered into every poly envelope to ensure the bag is fully functional under all bag applications and uses. For example, here are some top level envelope criteria that must be analysed for each application.

- Glue adhesion It is critical that the adhesion have an instant bond with the material.
- Coefficient of Friction (COF) to ensure the bag performs and works on Conveyers and Distribution centre's.
- Multi-Layer extruded films to ensure bag performance, opacity and cost efficiencies.
- Seal strength film must have tremendous seal strength to ensure performance.
- Puncture resistance film must meet certain puncture criteria for the contents being loaded and during transportation.

There are many additional features that EUPHORIA PACKAGING can be customized for our customer's specific requirements:

Here are a few to list:

- Double strips of glue and liner for simplified end customer returns
- Anti-static release liners to be used in high volume distribution centre's
- Intermittent glue/Glue Gap on edges for easy liner tear-off
- Single/double/multiple perforations for easy opening of package
- Bag sequential numbering and UPC for security applications
- Tamper evident release tapes-Level 3/ Level 4/Level 5 for high security applications
- Bag handles for easy carry
- Bubble lining for fragile and protective packaging
- Gussets for added bag expansion

Advantages of buying from Euphoria Pack:

1. Composite in house manufacturing facility from Film Extrusion – Printing - Bag making all under one roof.
2. State of art machinery with world class extrusion to and printing & bag making machines.
3. One of Highest capacity in the country, owing to shortest lead times.
4. Also offer buffer stocking for dispatches within 24 hours.
5. Euphoria Packaging has a long list of green credentials and a deep-rooted commitment to environmental responsibility and operates according to an effective eco-strategy.
6. Our experts will help you choose the right material for your specific needs. Paper bags, plastic bags or reusable bags – we deliver the right product at the right price.
7. Beautiful packaging is not only a great way to showcase your brand, but an integral part of your visual identity. Our job is to support your marketing teams in designing products that reflect your company's image and fully meet your quality standards.
8. Euphoria packaging will showcase your company's brand with exceptional-quality high color accuracy in printing, precision graphics and premium materials.

○ **PE LAMINATION FILMS**

Our wide range of lamination films cater to the FMCG segments as well as other segments such as Pharma, Industrial Appliances, Ready to Eat food, etc.

These films are made on order as they are formulated & engineered to the specs pertaining to the product being packed inside as it is the inner layer of the laminate which comes in contact with the food. Lamination Films are used as sealant Layer in flexible packaging. These films are laminated with printed polyester films. It is a mix of PE film, Printed PET and Aluminum PET, it helps in increase in self life, hygiene, sealing, and freshness.

The film assists in increasing shelf-life, avoiding contamination, retaining the freshness & aroma as well as enhances the branding of the product.

- Used for lamination to polyester
- Available in widths upto 1.7 meters
- Thickness Range from 18-300 microns
- Colours : Natural, White opaque. Other colours available on request.
- Applications : FMCG packaging, Seeds Packaging, Pesticide Packaging, Dairy Products, Vacuum Pouches, etc.

○ **LDPE/LLDPE BLACK & WHITE/TRANSPARENT FILMS**

We are one of the leading manufacturers and suppliers of LL/LDPE Based Transparent/Clear/White Outside & Black/Gray inside Films.

Applications:

- Tamper Proof Courier bags
- Garment Packing bags

○ **PE ANTI-STATIC Films**

These films are effective in the packaging industry for reasons such as keeping away dust, avoids products sticking to each other, hazardous shocks, damage of the product, etc.

Products that are highly corrosive should be packed in these films to avoid the danger caused from static charges.

- **LDPE/LLDPE SHRINK FILMS**

We are one of the leading manufacturers and suppliers of LL/LDPE Based Shrink Films. We are manufacturing and supplying good quality LL/ LDPE (Low Density Polyethylene) based high quality shrink film, which is a world class standard packaging solution ideally suitable for packing wide range of products at an economical cost. LDPE (Low Density Polyethylene) Shrink Films are used for wrapping products like pharmaceuticals, cosmetics, glass bottles, cans, tins, beverages, tetra packs, cartons, consumer durables, stationery and all sorts of industrial products. LDPE Shrink Film is mainly used for unitizing and bundling multiple units of products for better handling and ease of distribution. Our LDPE (Low Density Polyethylene) Shrink Films provide extra protection, and makes the pack pilfer proof and reduces theft in transit. Our LDPE (Low Density Polyethylene) Shrink Films are also used on automatic shrink wrapping machines. LDPE (Low Density Polyethylene) Shrink Films are manufactured with eco-friendly recyclable materials and are recyclable. As it is light, the shrink films also help you save huge amounts in transport and freight.

- -Thickness from 30 to 300 microns
- -Width upto 67 inches (1700 mm)

ADVANTAGES OF OUR LL/LDPE (LOW DENSITY POLYETHYLENE) SHRINK FILMS

- Cost effective when compared to corrugated boxes
- Low cost of shipment and reduced storage space
- Tamper and puncture proof
- High shrinkage
- Tough transportation
- High holding force and good sealing strength
- UV resistant

ISO 9001: 2015

MULTILAYER BLOWN FILM EXTRUSION MACHINES						
Sr no.	Machine Name	Max Working Width	Capacity PCS	Installed Capacity KGS	Utilised Capacity KGS	Remarks
1	Multilayer Blown film extrusion – Fully Automatic	1650 mm	-	5500	5000	With EPC (Extrusion process control system) Doteco, Italy for excellent film thickness control and quality control. All layers srew barrel with Tungston carbide coating to ensure maximum Recycled material can be consumed
2	Multilayer Blown film extrusion – Fully Automatic	1750 mm	-	6000	5500	With EPC (Extrusion process control system) Doteco, Italy for excellent film thickness control and quality control. All layers srew barrel with Tungston carbide coating to ensure maximum Recycled material can be consumed
3	Multilayer Blown film extrusion – Fully Automatic	1450 mm	-	4200	3800	With EPC (Extrusion process control system) Doteco, Italy for excellent film thickness control and quality control. All layers srew barrel with Tungston carbide coating to ensure maximum Recycled material can be consumed
4	Multilayer Blown film extrusion – Fully Automatic	1450 mm	-	4200	3800	With EPC (Extrusion process control system) Doteco, Italy for excellent film thickness control and quality control. All layers srew barrel with Tungston carbide coating to ensure maximum Recycled material can be consumed
5	Multilayer Blown film extrusion – Fully Automatic	1800 mm	-	6000	5500	With EPC (Extrusion process control system) Doteco, Italy for excellent film thickness control and quality control. All layers srew barrel with Tungston carbide coating to ensure maximum Recycled material can be consumed
			Total	25900 kgs	23600 kgs	

PE BUBBLE FILM EXTRUSION MACHINE						
Sr no.	Machine Name	Max Working Width	Capacity PCS	Installed Capacity KGS	Utilised Capacity KGS	Remarks
1	PE Bubble film 4 layer Extrusion – Fully Automatic	1600 mm	-	4000	3000	Fully automatic with Thickness control & online recycling

PLASTIC WASTE RECYCLING - Making our company 100 % Waste Free - Eco Friendly						
Sr no.	Machine Name	Max Working Width	Capacity PCS	Installed Capacity KGS	Utilised Capacity KGS	Remarks
1	Plastic Waste Recycling machine – Fully Automatic	90 mm Single Screw	-	3500 kgs	3000 kgs	Die face cutter with Dual Process Mother & Baby extruder for recycling of crude plastic waste

PRINTING MACHINES						
Sr no.	Machine Name	Max Working Width	Capacity PCS	Installed Capacity KGS	Utilised Capacity KGS	Remarks
1	Roto Gravure - 6 color	1350 mm	-	5000	5000	With ATE Auto registration controller. With 5 Drive system. Registration control upto 0.30 mm
2	Roto Gravure - 4 color	1000 mm		4000	3500	With Reverse printing
3	Roto Gravure - 3 color	2000 mm		6000	5000	2.1 Mtr wide width
4	Flexo Printing - 2 color	1000 mm		2000	2000	
5	Roto Gravure - 3 color - SPECIALISED PAPER Printing with reverse printing	1250 mm		5000		Starting End Oct'21
	Total			22000	15500	

BAG MAKING MACHINES						
Machine no.	Machine Name	Max Working Width(Bag form)	Capacity PCS/day	Installed Capacity KGS/day	Utilised Capacity KGS/day	Remarks
1	Side seal - With Twin seal	800 mm	100000	1000	800	With Document Jacket/Poly mailers
2	High Speed Side seal - With Twin seal	500 mm	100000	1200	960	Cash transit pouches/High security pouches
3	High Speed Side seal	800 mm	100000	2000	1600	LDPE Garment Re-closable bags
4	High Speed Side seal	800 mm	150000	2000	1600	With Document Jacket/2 strip return bags/Poly mailers
5	High Speed Side seal	800 mm	150000	2000	1600	2 Strip Return bags/ Sequential Barcode/QR Code
6	Bubble bag machine (With High security VOID tape sealer & Document Jacket sealer)	800 mm	60000	900	720	Bubble mailers with 2 Strip Return bags/With POD jacket PAPER TAMPER PROOF BAGS
7	High Security bag Machine, - With Twin seal	800 mm	80000	1000	800	For Gold Loan/STEB/Cash Transit/Examination paper High security pouches
8	High Speed Side seal	800 mm	150000	2000	1600	LDPE Garment Re-closable bags
9	High Speed Side seal - With Twin seal	1000 mm	100000	1800	1440	With D Cut Handle & Twin Seal High Security Pouches/QR barcode
10	High Speed Side seal	800 mm	150000	2000	1600	2 Strip Return bags/ Sequential Barcode/QR Code
11	High Speed Side seal	800 mm	150000	1500	1400	2 Strip Return bags/ Sequential Barcode/QR Code
12	High Speed Side seal	800 mm	100000	1500	1400	2 Strip Return bags/ Poly Mailers
13	Bubble bag machine (With Bottom Gusset Attachment)	800 mm	50000	900	720	High speed with strong Ultrasonic Bottom Gusset sealing PAPER TAMPER PROOF BAGS
14	High Speed Side seal - Twin Seal (Gold Loan & High Security bags attachment)	1000 mm	150000	1500	1400	High Speed strong Twin Sealing with document pouch
15	High Speed Side seal (With Top Fold for Shopping bags and Ice Bags)	800 mm	100000	1500	1400	LDPE Ice Bags or Auto part with Cotton Draw String Top folded

16	High Speed Wide seal(Specialised Tamper proof Kraft Paper mailer bags)	600 mm	75000	1000	900	Paper mailer bags with Wide seal technology (Plastic free)
17	Auto bags (Pre opened bags in Roll form/Box packing),	800 mm	75000	1000	800	APS bags on Rolls or Fan Folded, compatible for Automated Packing system bagger machines & Bottom gusset bags/Bags on rolls PAPER AUTO BAGS
18	High Speed Wide seal(Paper bags, Laminated pouches, 3 side seal pouch, Standup pouches, Zipper Stand up Paper & Plastic pouches)	600 mm	75000	1000	900	Paper mailer bags with Wide seal technology (Plastic free)
19	High Speed Wide seal(Specialised Tamper proof Kraft Paper mailer bags)	600 mm	75000	1000	To be installed end Oct'21	Paper mailer bags with Wide seal technology (Plastic free)
20	Bubble bag machine(With Bottom Gusset Attachment)	800 mm	50000	900	To be installed end Nov'21	High speed with strong Ultrasonic Bottom Gusset sealing/Bubble lined Zipper bags PAPER TAMPER PROOF BAGS
	Total		2040000	27700	21640
